INDIANS OF THE RIO GRANDE VALLEY. Adolph F. Bandelier and Edgar L. Hewett. University of New Mexico Press. 1937. 280 H49.

The Pueblo Indians of the Rio Grande Valley are an important element in our population. It is essential to know the natural history of their environment and their present day culture to understand these people, who in a very real sense live in the past as well as in the present; whose ancestors, to their way of thinking, actually live and move among them, guiding their lives in the good ways of old. An understanding of Pueblo life as it continues in our time is necessary to complete the cultural history. The book is illustrated with beautiful color plates.

A PECOS PIONEER. Mary Hudson Brothers. University of New Mexico Press. 1943. 138 B79.

A narrative of Southern New Mexico, its pioneers and their adventures, based upon facts that are a part of the history of the Hudson family. The book deals in a fresh and vital manner with those incidents and people who made Southern New Mexico from 1880 to 1900 one of the richest sources of romance and adventure known to us.

PLANT DISEASES AND PESTS

DISEASES AND PESTS OF ORNAMENTAL PLANTS. B. O. Dodge and H. W. Rickett.
Jaques Cattell Press. 1943. 464.08 D66.

For convenience the book has been divided into two parts. Part One is a compact introduction to the study of plant diseases and pests. In this section the authors do not merely list symptoms and prescribed preventatives - they show why these symptoms appear, what they are likely to indicate and on what principles prevention may be used.

In Part Two some six hundred species of garden and greenhouse plants are listed alphabetically; under each plant are its important diseases and the proper methods of their control.

Insects and other pests attacking agricultural crops. Calif. Agric. Ext.

POST-WAR

Agriculture when the war ends. USDA. Interbureau Committee on Post-War Programs. October, 1943.

New Mexico Post-War Agricultural Programs, a preliminary report. USDA and New Mexico Agric. College. February, 1944.

PLANNING FOR AMERICA. George B. Galloway. Henry Holt. 1941. 280.12 Gl3p.

Although this volume was written before Post-War Planning as such was organized, it serves as a convenient reference on planning activities in various fields.

There is much to commend in this volume, but at the same time many readers will find not a few things to which they will take exception. This is not to be deplored in a field involving such controversial issues as that of planning. On the whole, the hopes and promises of planning receive somewhat more attention than the problems and difficulties, which probably is to be expected at this stage of development.

Preliminary report on Utah's Agriculture during Post-War Period. Utah State Agricultural Planning Committee. February, 1944.

PUBLIC ADMINISTRATION

As I See It: observations of a civil servant. 50 essayettes of 150 words. Warner W. Stockberger. USDA. Graduate School. 1941.

CAREERS IN PUBLIC RELATIONS; THE NEW PROFESSION. Averell Broughton. Dutton. 1943. 238.2 B79.

Averell Broughton, a Public Relations and advertising executive, head of his own business, explains the field, its two-fold job and its open secrets in straight-forward fashion. He argues that Public Relations is a matter of applied common sense in the many varied experiences in dealing with people.

It is the purpose of this book to develop the author's definition of Public Relations, describe the business and its tools and techniques, and thus pave the way to a wider understanding and appreciation of its importance.
